SeaDek[®] MARINE PRODUCTS

Material Information

Colors

Textures

Select colors are exclusively available in the thicknesses listed below, and are marked accordingly.
* Exclusively available in 3mm (3mm material is laminated together as a top and bottom layer to create a two-color, 6mm composite.)
** Exclusively available in 5mm

Thicknesses

Typical Cockpit Kits and Swim Platform Pads are 5mm (one color) or 6mm (two colors). Anti-fatigue Helm Station pads can range from 13mm to 23mm. Coaming Bolsters are typically 20mm or 23mm.

Warranty Consideration

Note, because of excessive heating when exposed to sunlight, black is not recommended as a top color. Therefore, it is not covered under the product warranty.

Overview

Each sheet of clear vinyl represents one sheet of SeaDek. For larger parts or kits, please tape together sheets or pieces of clear vinyl and our CAD department will break down the parts appropriately. Please use the boat diagram to illustrate a rough idea of where each part belongs on the boat and how each piece relates to each other. Mark the top, bow, and stern on each part so that orientation is easily identifiable. **Please do not fold the clear vinyl sheet.**
